

SEISMIC MONITORING SOLUTIONS

Induced, Local, Regional & Global

BACKGROUND

Nanometrics provides equipment and solutions for studying man-made and natural seismicity.

Industry Offerings:

- End-to-end capabilities
- International service centers
- HSE, ISNetworld certified
- Installation, maintenance and support
- Data centers
- Advanced data products

Our pedigree at a glance

We have the most weak motion broadband networks in operation around the world. We specialize in obtaining and analyzing critical seismic data in real-time.

1ST to introduce regional traffic lights in Canada	34 Libra VSAT networks globally	90+ countries with active customers	1,100/yr broadband seismometers sold to research institutes	2,000+ Libra VSAT stations in operation	15,000+ seismological instruments in operation
